

DEEPANSHU

B-Tech -Computer Science Undergraduate

New Delhi, India | d2004gautam@gmail.com | [linkedin.com/in/deepanshu-gautam-d15d7](https://www.linkedin.com/in/deepanshu-gautam-d15d7) | github.com/Deepanshu07-eng | [Portfolio](#)

SUMMARY

Computer Science undergraduate with strong skills in Python, SQL, FastAPI, and Data Structures & Algorithms. Built end-to-end backend and data analysis projects using FastAPI, Streamlit, MySQL, Pandas, and Power BI. Seeking Software Development or Data Analyst internship opportunities.

SKILLS

Programming Languages: C++ (Data Structures & Algorithms), Python, SQL, JavaScript

Data Analysis & Visualization: Pandas, NumPy, Matplotlib, Seaborn, Excel, Power BI (learning)

Databases: MySQL, MongoDB

Frameworks & Tools: FastAPI, Streamlit, Git, GitHub, Jupyter Notebook, Postman, VS Code

Core Concepts: Data Structures & Algorithms, Data Cleaning, Exploratory Data Analysis, Database Design, Object-Oriented Programming (OOP)

PROJECTS

Smart Queue Management System | Python • FastAPI • MySQL • Streamlit | 2026

- Developed a digital queue management system using FastAPI, MySQL, and Streamlit to improve queue efficiency and reduce waiting time.
- Built backend services using FastAPI for authentication, token generation, priority queue handling, and real-time queue tracking.
- Designed role-based Admin and User dashboards with live status updates and reports.

Smart Bus Route Optimization System | Python • FastAPI • MySQL • Streamlit | 2026

- Designed and built a route optimization system for school and college transport to reduce travel time and route confusion for students and drivers.
- Built backend modules using **FastAPI** with **MySQL** to manage student, driver, and route information.
- Built an interactive Streamlit interface, including a login/signup module, to let users search and view optimized routes.

Real-Life Netflix Data Visualization | Python • Pandas • Matplotlib | 2026

- Cleaned and processed a real-world Netflix content dataset using Pandas, handling missing values and inconsistent formatting.
- Performed exploratory data analysis to uncover trends across genres, release years, and countries of production.
- Built visualizations with Matplotlib to communicate content trends and distribution patterns clearly.

Employment Data Cleaning & Preprocessing Project | Python • Pandas | 2025

- Cleaned and pre-processed a real-world employment dataset by handling missing values, removing duplicate records, and correcting inconsistent data formats.
- Standardized categorical values, formatted columns, and improved overall data quality for reliable analysis and reporting.
- Automated data preprocessing using Python and Pandas to create an analysis-ready dataset.

EDUCATION

B.Tech in Computer Science | PDM Institute of Technology | 2023 - 2026

- Coursework: Data Analytics, Database Management Systems, Operating Systems, Computer Networks, Software Development.

CERTIFICATIONS

- Google Data Analytics Professional Certificate (In Progress) - Google, Coursera
- SQL (Intermediate) Certificate - HackerRank (2026)
- Python Certification - freeCodeCamp (2026)
- Data Structures & Algorithms in C++ - Coding Blocks; scored 92%, awarded Certificate of Excellence (2025)
- Led a team at Hackshastra Hackathon, coordinating task division and delivering a working project under time constraints (2025)
