

DEEPANSHU

Data Analyst

☎ +91-7428050415 ✉ d2004gautam@gmail.com 🔗 [linkedin.com/in/deepanshu-gautam-d15d7](https://www.linkedin.com/in/deepanshu-gautam-d15d7)

Summary

Final-year B.Tech CSE student skilled in Python, SQL, and Data Analytics. Familiar with data cleaning, EDA, and visualization using Pandas, NumPy, Matplotlib, and Seaborn. Strong problem-solving skills with 150+ DSA problems solved. Seeking a Data Analyst opportunity to apply analytical skills and gain industry experience.

Skills

Programming & Query Languages: Python, SQL, C++, JavaScript

Data Analytics: Pandas, NumPy, Data Cleaning, Exploratory Data Analysis (EDA), Descriptive Statistics

Visualization Tools: Matplotlib, Seaborn, MS Excel, Power BI (Learning), Tableau (Learning)

Web Development: HTML, CSS, JavaScript, React.js, Node.js, REST APIs

Tools & Platforms: Git, GitHub, VS Code, Jupyter Notebook, Excel

DSA & Problem Solving: Data Structures & Algorithms in C++, 150+ Problems Solved

Projects

Gun Detection System | *Python, OpenCV*

- Developed a gun detection system using Python and OpenCV for image and video analysis.
- Applied Haar Cascade, NumPy, and imutils for real-time object detection.
- Processed video frames to improve automated weapon detection accuracy.

Student Result Analysis | *Python, Numpy, Pandas, Matplotlib, Seaborn*

- Analyzed student performance data using Python to identify score and subject-wise trends.
- Performed data cleaning and exploratory data analysis (EDA) using Pandas and NumPy for accurate insights.
- Created visualizations including bar charts, histograms, and heatmaps using Matplotlib and Seaborn to compare student performance.
- Identified high-performing and low-performing student groups to understand factors affecting academic results.
- Generated insights and summary reports to support data-driven academic performance analysis.

Retail Customer Behavior Analysis | *SQL, Python, Power BI*

- **Analyzed retail customer shopping behavior and transaction patterns using Python, SQL, and Power BI** to identify business insights and customer trends.
- Performed data cleaning, transformation, and exploratory data analysis (EDA) using Pandas and NumPy on real-world retail datasets.
- Wrote SQL queries to solve business problems related to customer purchases, sales performance, and product trends.
- Built an interactive Power BI dashboard with KPIs, sales trends, customer segmentation, and purchasing insights for decision-making.
- Created a detailed project report and published the complete workflow on GitHub for portfolio presentation.

Awards & Certifications

- **Google Data Analytics Professional Certificate:** Completed 8 practical case studies involving SQL, data cleaning, dashboards, and presentations.
- **Coding Blocks Data Structure & Algorithms Certificate (2025)** Completed the DSA course with 92% marks and earned a Certificate of Excellence from Coding Blocks.
- **freeCodeCamp Data Analysis with Python Certification:** Developed practical skills in Python, Pandas, NumPy, and data analysis through hands-on projects.
- **freeCodeCamp Scientific Computing with Python Certification:** Built a strong foundation in Python programming, problem-solving, and object-oriented programming concepts..

Education

Bachelor of Technology - Computer Science & Engineering

Expected Graduation : 2026

PDM University, Bahadurgarh
